COMPROMISO DE TRANSPARENCIA

🚀 SPANISH GRAPEFRUIT SEASON 2025/2026 💴 🍑

AILIMPO estimates a total GRAPEFRUIT harvest of 101,000 tonnes for the 25/26 season, 5% less than in 24/25.

Spain will consolidate its position as the leading producer in the EU

Murcia, 11 September 2025

AILIMPO's grapefruit harvest estimate for the upcoming 2025/2026 season forecasts production in Spain of 101,660 tonnes, representing a slight decrease of 5% compared to the production balance for the 2024/2025 season, which closed with a final production of 107,010 tonnes, according to the provisional balance sheet, which takes into account exported, processed and domestic market fruit, as well as weight losses.

The Board of Directors of AILIMPO, with representatives from ASAJA, COAG, UPA, Cooperatives, Exporters and Processors, has validated the grapefruit harvest estimate and stated that this season will mark the consolidation of Spain as a leading supplier in the European market.
